

**twiCeme**<sup>®</sup>  
NFC MEDICAL ID

## twlCEme® | The company

The founders are former military and security professionals.

In case of an emergency situation out in the field they recognized a need for a:

**smart, simple and user friendly identification system.**

# twICEme® | Our purpose

**twICEme® helps people in emergency situations and aims to save lives.**

We make this possible by integrating **twICEme® devices** into equipment and providing the necessary **safety services.**

## twICEme® | The integrated device

- A twICEme® device is 29mm x 1mm
- The device is enabled with NFC (Near Field Communication) technology
- No battery - unlimited life time
- Can handle extreme temperatures
- Large memory capacity & rapid reading

# twICEme® | The safety service

- A locally stored medical ID service (**no cloud service involved**)
- No GSM/3G/4G/5G or wifi is needed for communicating i.e. completely offline
- Maintenance and development of our free app
- Community building to ensure global knowledge of the trademarked twICEme® symbol

# twICEme® | The concept

DOWNLOAD APP

CREATE YOUR MEDICAL ID

TAP SYMBOL TO STORE ID ON twICEme® DEVICE

TAP twICEme® SYMBOL TO READ ID

# twICEme® | The global community

Brand owners

Customers

Rescue  
organizations

Our vision is to become a global brand by uniting brand owners, rescue organizations and customers in a **global community for smart safety.**

## twlCEme® | POC – proven concept

- Official in both ski and bike segment
- Ski helmet awarded at ISPO, one of the largest global outdoor fairs
- Bike helmet awarded at Eurobike, the largest global bike fair
- Key reasons for a great response from the industry:
  - ◆ Using **NFC technology** to enable digital safety
  - ◆ The vital information is **locally stored** and fully controlled by the user

## twICEme® | Summary

- twICEme® is a smart, simple and user friendly identification system. twICEme® helps people in emergency situations and aims to **save lives**.
- We make this possible by integrating twICEme® devices into safety equipment and providing the necessary safety services. **The mobile apps are free for everybody to use.**
- With the apps the user create and upload medical ID to the integrated device. I case of an emergency situation anyone with a smart phone can read the uploaded information by placing a smart phone over the twICEme® symbol.
- The vital information is **locally stored** and fully controlled by the user (no cloud service involved).
- twICEme® use NFC technology i.e. no GSM/3G/4G/5G or wifi is needed.
- Our registred symbol  will be seen on a growing number of safety equipment.
- Our vision is to become a global brand by uniting brand owners, rescue organizations and customers in a **global community for smart safety**.
